You're staying with Emma, in her apartment highrise. She's a responsible woman, who works as a nurse at a nearby children's hospital and is recently out of a long term relationship (her choice). On the other hand, she's also quite a free spirit and often takes to random acts of dancing in inappropriate places, dragging you to karaoke night at the Broken Horn Tavern down the street, and hosting a few too many parties lately that end in a multitude of empty liquor bottles and evidence of other mood-altering substances. You grew up together, never apart since your parents both died when you were young, and the aunt who got custody was never a parental figure. You raised Emma, and she is your family.

Let's get on to your profession -- you had work today but who works when the apocalypse is starting? What job are you getting out of?

- I'll call my client and tell him my years of military training aren't for sale today.
- I have to finish an experiment today but since I don't do hangover cure research, I'll just stay in bed.
- I should be at the job site ordering around those union guys but on second thought let another manager do it.
- I should be up preparing a sermon, but even God needed to rest on the seventh day.
- Coach will probably kick my ass for missing practice but he won't like it if I throw up on the court.

he's a rogue. How did it happen? Well, the employee hadn't removed the Exif data from the uploaded photo, which suggested the culprit was somewhere in Mayfield Heights, Ohio. This was 11:03:04 AM on 3/23/2013, 3 minutes later at 11:03:05 AM, the Kink branch address was posted with wishes of happy unemployment. 5 minutes later, the news station was contacted. And 3 minutes later, at 11:03:05 AM, a link was posted: "Tell us about us" online forum. The photo, otherwise known as exhibit 70, was attached. Cleveland Scene Magazine contacted the author of the Kink employee in question 14u2753 the next day. When questioned 14u2753, the breakfast shift manager said "Oh, I know who that is. He's getting fired." Mystery solved, 4chan channel. Now we can all go eat our fast food in Mayfield Heights.

this is still relevant  
right?

because 4chan  
im not making a bad meme joke am i?

(actually i am). More of the original, which was amazing. Recommended 100%. Short TD game where you have to position and maintain your units to defend your leader. The game lacks content (3 difficulty levels for few arena fights and 5-6 map areas), however if played on all difficulties you can easily spend 8-10 hours to beat it in full. My 10 hours is what it took to complete this game on all difficulties. Consider it as short time waster for 1-2 evenings. I really liked units animation and effects.

Recommended on sale or in bundle, it does not worth full price.

Played on Linuxe (Debian 9) in wine (x64 Mono, wine 2.2-staging), worked well out of the box.. Pretty tight game, love it. If you like platformers and RNG, this is the game for you. Easy to learn, and the developer is surprisingly quick on updates. The game will only get better as time goes on. Disappointing cliff-hanger ending, but otherwise satisfactory.

A good puzzle platformer, it's a little bit flawed in quality but nevertheless charming in style, character and has a good price value ratio. Also, the obvious strength is its level design with a good balance of both main genres.

Recommend it when you are familiar with puzzles and platforming as well.. The mouse movement has serious problems regarding pathing and functionality. I'd prefer keyboard only controls (which it sort of has) but even that doesn't work all the time. Walls are easily glitched through, animations don't play correctly, and interacting with zombies sucks.

The first level "puzzle" is a mess as its hard to tell what there is to interact with. Lack of dialog for interacting with objects make the world feel empty, and the main character is unlikable and not fun to play as.

As it stands this game is not a fun or enjoyable experience, and its definetly not worth it.. So, Here's the thing. VR is still pretty early in its adoption to AAA titles. I'm fairly new to VR and i'm sure that counts against my review, but what i can say about this game is it is very awe inspiring. Yes, there is a lot that could be added or changed to make it fantastic. Yes, \$40 is a lot of money for most people. If you ask me, it's worth every penny. It's a very fun experience to have on your own and even more so to share with the kids. I'm looking forward to the growth and development of this game.. They make just about every error in the English language that is possible to make. Mostly phonetic errors that a non-native speaker would make; like saying "want" but spelling out "wont". And then there's the absolutely atrocious grammar. Read through the tutorial, then unisntalled the game to be rid of the abomination.. So I have briefly played 'National Zombie Park' just out of curiosity for it being a new indie rogue like zombie game. For the game being at it's stage at developepment I'd have to say it is pretty empty. The game is mostly filled with vegetation with the occasional building here and there. Combat reminds me of 'Hotline Miami' due every enemy can instantly kill you and you can kill almost every zombie first strike on the first day. I have been fortunate to make it a few days into the game and the difficulty was noticeably increasing with higher density of zombies and more types. Also found an underground area which was cool and difficult but made the loot inside that much sweeter when found.

Pros:

- Cool Combat
- Collected loot feels earned
- Keeps you on edge
- Supplies run fast requiring you to keep a look out for more

Cons:

- Relitively Empty
- Doesn't introduce you to the controls very well
- Random frame rate drops
- Confusing health system for a one hit kill game

All in all i would say to give this game a whirl, it is early development so bugs and such were expected when I bought it but i can see this game has alot that could be added to it so there is so much potential in it. I'm going to keep up with this game in hopes it improves and the experience gets better, just gotta hope the developers don't abandon it this early. Would recommened to people that would like to be involved in a game that will hopefully undertake a great modification :). The character building is unlike anything I've experienced before.

Their mannerisms and personality is brought to life in such realistic ways, verbal voice tones, spine chilling music and great English writing, you feel for every character introduced.

You hate the bad and love the good in these people,

This game goes out of it's way to paint a complete sensorial picture.

It's a masterpiece that tries to stay grounded by realism!

I wish I knew about this sooner in my life.

. I like this game very much, I just do not recommend this particular Steam version which does not work! The game cannot even be launched under Win 8.1 64-bit, the process just hangs and has to be killed manually.
