About This Game

Adrenaline rushing, fast-paced roomscale SciFi shooter for HTC Vive and Oculus Rift

VR Shooter Guns is about bare survival in a sci-fi environment.

Skill, speed and tactics are required.

You'll get so sweaty that you can skip the gym afterwards.

Fight your way through a space station to escape evil robots!

In a distant future, petty humans only exist to consume what gigantic automated robot facilities are producing. These vast factories floating in space have been built by generations of both, humans and robots.

You are one of those solitary humans, whose job hasn't been replaced by androids yet.

Alone in space with the sole purpose to supervise the assembly during endless boring shifts.

And the Artificial Intelligence watches you.

Nothing ever happens.

Until NOW.

fun game -). I really like the simplicity of the game.. It is a mystery.. The game at the same time and pleases and causes anger. Some levels explode the brain. Some pass on the fly spent weeks playhing the board game and have nearly every expansion and zombie pack (dogs, crows, special hot dog zombies, yeah hot dog zombies - play like normal walkers however kill so many and you get a pimp mobile weapon!)

I don't know if this game has recently updated or not but it runs so much better than it originally did and thoroughly excited to be playing this with friends. only thing I want to see more of are the expansions such as toxic city, prison outbreak, etc the zombie dogs crows and so much more are promising and hell in all honesty i would happily pay for the expansions digitally as long as they aren't stupid prices.. Still better and more original than PUBG

I was disappointed by the lack of actual historical immersion, as the game presents some kind of alternate universe history, that is inclusive and diverse and looks more like a larp session with people from today than a viking expedition (pretty much like the TV show, and that's precisely my dislike).

The game has many aspects that I like, but in the end, I just found playing it annoying and couldn't finish it.. It's nice to see a new unit roster for the celts. It was much needed.

+ Some cool looking units that make the celts unique.

+With the ability to be able to deploy all celtic units outside of the deployment zone with the guerrilla deployment, it makes them feel different to other nations on the game.

- I've only found one unit so far not to say the generic barbarian voice and say "Scrappers" or "infantry" when select them. I wish they would say their unit type, like they have in the past with other units.

Other than that i think this pack is good. 10V10 would play as the celts.

(pls more music). Great Game! Graphics look really good even in low quality mode. Really fun to play.. Cute little game. Too bad it doesn't have checkpoints or other saving system. I hate nerve cracking games where you need to be able to do a perfect run on a level; one mistake and it's all over again.. Not very pretty on the outside, but make no mistake, this game is a labor of love.

♥♥♥♥/10. sure i understand the dlc is a steep price. but the only dlc i found nessisary was the free one for the free mats. with that i made tons of high stated gear. that alot of the enemys did basically no damage. unless it was a status effect and still did considerable damage. so.. the dlc was not really nessisary? the paid ones anyways only paid dlc i found any vague interest in was the spiked boots. everything else kind of either was useless. didnt really need to exist. or became blantantly obsolete

the story is basically there to try and tie up all the story of each character. and give them that happy ending. ontop of the main story which involves the twins emotional story of family and what they want to do in life. (just like the other two games.) so from the atelier "mysterious" series having a story like this is expected. a happy ending for all!. Technically this game isn't an adventure game, it's actually a party puzzle game with a story. Each player takes turn to solves puzzles to earns some medals and learn some truth and information. Although this game isn't an adventure game, you'll have to use your detective skills (deduction and observation) to find the real culprit in each episode.

The gameplay is pretty straightforward, you don't need to solved every puzzles or correctly guessing the real culprit, the story itself will move forward anyway.

For \$19.99 this game is pretty expensive. I recommend trying the demo first. If you like it you should buy when it's on sale (probaly around \$5-\$7). I'm not recommend buying at full price beacuse for \$19.99 you can buy better games with better story, such as Syberia, Broken Sword, or Emerald City Confidential.. Low resolution
